

JANMARK SUELTO

FULL STACK DEV & AI AUTOMATION SPECIALIST

+639690221571 | <https://portfolio.janmarkking.workers.dev> | Malaybalay, Bukidnon Philippines

PROFESSIONAL SUMMARY

Full-Stack Developer & AI Automation Specialist with experience building React and Node.js applications, n8n automation workflows, REST API integrations, and Supabase/PostgreSQL systems. Skilled in developing business automation, dashboards, lead-management systems, and workflow integrations. Interested in Full-Stack Development, Backend Development, AI Automation, and Technical Support roles.

EDUCATION

2022 - 2026

Bachelor of Science in Information Technology

Bukidnon State University

TECHNICAL SKILLS

- Frontend: React, TypeScript, JavaScript, Tailwind CSS
 - Backend: Node.js, Express.js, REST APIs
 - Database: PostgreSQL, Supabase, MySQL, MongoDB, Firebase
 - Automation: n8n, Webhooks, API Integrations
 - AI: OpenAI API, Gemini API, Prompt Engineering
 - Tools: Git, GitHub, Postman, Vercel, Render
-

WORK EXPERIENCE

Cagayan de Oro City Feb 26 - May 08 2026

IT Intern / OJT — Concentrix

- Assisted with workstation setup and basic hardware troubleshooting. Performed equipment inventory and device checks.
 - Supported data encoding, spreadsheets, and technical documentation.
 - Assisted IT and other departments with day-to-day technical tasks.
 - Helped organize and maintain workplace equipment and systems.
-

PROJECTS

LeadFlow AI — AI Lead Qualification System

React • n8n • Supabase • Gemini/OpenAI

- Built a workflow that captures and organizes website leads.
- Used AI to classify, score, summarize, and prioritize inquiries.
- Connected the frontend, automation workflow, AI model, and database.

JobRadar AI — Automated Job Tracking Platform

React • TypeScript • Supabase • n8n • APIs

- Built a system that collects and organizes job listings.
- Added automated filtering, classification, and duplicate detection.
- Created a dashboard for reviewing and tracking opportunities.

Real-Time Collaborative Whiteboard

React • TypeScript • Cloudflare Workers • Durable Objects • WebSockets • Supabase • tldraw

- Built a real-time collaborative whiteboard with multi-user drawing and live synchronization.
- Used Cloudflare Durable Objects and WebSockets to keep board changes synced across connected users.
- Implemented authentication and protected data access with Supabase Auth, PostgreSQL, and RLS.

Point of Sale (POS) System

React • Vite • Node.js • Express • MongoDB

- Built a POS system for managing products, users, sales, and payments.
- Added secure PIN-based login and product image management.
- Created checkout, payment, and receipt functionality.
