

JANMARK SUELTO

FULL-STACK DEVELOPER | AI AUTOMATION SPECIALIST

+639690221571 | janmarkking@gmail.com | <https://janmark-suelto.vercel.app/> | Malaybalay, Bukidnon, Philippines 8700

PROFESSIONAL SUMMARY

Software Developer & AI Automation Specialist experienced in building React and Node.js applications, n8n automation workflows, REST API integrations, and Supabase/PostgreSQL systems. Skilled in developing business automation platforms, dashboards, backend services, and workflow integrations.

EDUCATION

2022 - 2026

Bachelor of Science in Information Technology
Bukidnon State University

TECHNICAL SKILLS

- Frontend: React, TypeScript, JavaScript, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs
- Database: PostgreSQL, Supabase, MySQL, MongoDB, Firebase
- Automation: n8n, Webhooks, API Integrations
- AI: OpenAI API, Gemini API, Prompt Engineering
- Tools: Git, GitHub, Postman, Vercel, Render

WORK EXPERIENCE

February 2026 - May 2026

IT Intern

Concentrix | Cagayan de Oro City, Philippines

- Assisted with workstation setup and basic hardware troubleshooting.
- Performed equipment inventory and device checks.
- Supported data encoding, spreadsheets, and technical documentation.
- Assisted IT and other departments with day-to-day technical tasks.
- Helped organize and maintain workplace equipment and systems.

PROJECTS

Restaurant Order Automation

n8n • Supabase • WhatsApp • React

- Built an automated workflow for processing restaurant orders.
- Added customer WhatsApp notifications with retry handling for failed messages.
- Synced order statuses, message attempts, and workflow logs with Supabase.

E-commerce Order Processing Automation

n8n • Supabase • Telegram • REST APIs • Webhooks

- Built an automated order-processing pipeline for incoming e-commerce orders.
- Added order validation, duplicate detection, fulfillment updates, and customer/order status tracking.
- Implemented success, duplicate, and rejected-order alerts through Telegram.
- Stored customers, orders, fulfillment data, and workflow logs in Supabase.

Real-Time Collaborative Whiteboard

React • TypeScript • Cloudflare Workers • Durable Objects • WebSockets • Supabase • tldraw

- Built a real-time collaborative whiteboard with multi-user drawing and live synchronization.
- Used Cloudflare Durable Objects and WebSockets to keep board changes synced across connected users.
- Implemented authentication and protected data access with Supabase Auth, PostgreSQL, and RLS.

Point of Sale (POS) System

React • Vite • Node.js • Express • MongoDB

- Built a POS system for managing products, users, sales, and payments.
- Added secure PIN-based login and product image management.
- Created checkout, payment, and receipt functionality.

CERTIFICATIONS & TRAINING

- NLP Training Workshop, BukSU Leadership Development Program (2024)
- CCNA Enterprise Routing & Switching Coursework | Cisco Networking Academy | 2025
- Information Audit & Security, Cisco Academy (2025)
- System Administration & Maintenance, BukSU IT Department (2025)
