

JANMARK SUELTO

FULL-STACK WEB DEVELOPER • AI AUTOMATION SPECIALIST

Bukidnon, Philippines • +63 936 242 9608 • janmarkking@gmail.com

portfolio-janmark-suelto-primdq43fj.vercel.app/#projects

PROFESSIONAL SUMMARY

Full-stack developer and AI automation specialist experienced in building CRM workflows, multi-tenant applications, IoT monitoring systems, and business dashboards. Skilled in React, TypeScript, Node.js, Laravel, n8n, REST APIs, and SQL/NoSQL databases, with a focus on reliable and user-centered solutions.

EXPERIENCE

IT Intern

2026

Concentrix — Cagayan de Oro City, Philippines

- Supported workstation troubleshooting, equipment replacement, wire grooming, website monitoring, and end-user assistance across multiple production accounts.
- Tested and categorized approximately 50 headsets; performed data entry for monitor and networking-equipment inventories and maintained accurate asset records.

SELECTED PROJECTS

OmniFlow AI — Lead Intelligence & Automation Platform | [React](#), [TypeScript](#), [n8n](#), [Gemini](#), [Supabase](#)

- Built a lead pipeline that captures inquiries, classifies intent, scores priority, generates AI summaries, and stores structured CRM records through webhooks and PostgreSQL-backed dashboards.

Smart Pipe — Water Monitoring & Remote-Control System | [ESP32](#), [Orange Pi](#), [Firebase](#), [GSM](#), [IoT](#)

- Developed real-time flow, pH, and turbidity monitoring with leak alerts, GSM messaging, Firebase telemetry, reports, and remote solenoid-valve control.

Laravel Tenancy Reviewer Center | [Laravel](#), [PHP](#), [MySQL](#), [Multi-tenancy](#), [RBAC](#)

- Engineered a subdomain-based multi-tenant platform with isolated data, role-based access, test banks, schedules, and reporting for independently operated review centers.

Student Attendance Management System | [C#](#), [.NET WinForms](#), [MySQL](#), [BCrypt](#)

- Created an admin/staff desktop system for attendance, reports, audit logs, backup/restore, role permissions, account lockout, and QR/RFID/fingerprint-ready input.

Boarding House Finder | [Android Java](#), [Firebase](#), [Google Maps API](#)

- Built a GPS-based property marketplace with landlord listings, photos, prices, tenant filters, map pins, route directions, and messaging.

CodeMentorBot — AI Telegram Assistant | [Python](#), [Telegram Bot API](#), [Ollama](#), [SQLite](#)

- Developed a local-LLM coding assistant with debugging help, daily challenges, XP, badges, streak tracking, and scheduled reminders.

TECHNICAL SKILLS

Languages & Frontend: JavaScript, TypeScript, PHP, Python, C#, Java, SQL; React, Vite, Tailwind CSS, Bootstrap

Backend & Automation: Node.js, Express.js, Laravel, REST APIs, webhooks, n8n, Gemini API, OpenAI API, Ollama

Data, Cloud & Tools: Supabase, PostgreSQL, MySQL, MongoDB, Firebase, Git, GitHub, Docker, Vercel, Render, Postman

IoT: ESP32, Orange Pi, GSM/SMS, relay and solenoid control, sensor integration

Soft Skills: Communication, teamwork, problem solving, adaptability, time management, technical documentation

EDUCATION

Bachelor of Science in Information Technology

Graduated 2026

Bukidnon State University — Malaybalay City, Bukidnon
